

# ANIMAL HEALTH SUCCESS STORIES

Companion Animals everywhere are benefiting from the nutritional advantages of Eniva's Animal Health supplements. We invite you to read their remarkable stories:

Hi Eniva,

I'm a Pet Groomer and was thrilled when you came out with the Professional Formula Hip & Joint Support for Dogs! I immediately got hold of some of my customers to share the product with. The response was amazing!

"Pitoune" is a 12 year old Lab and would go for walks and had trouble getting up because she was so stiff. After being on it 4 weeks she was moving easier and going on walks again. We didn't tell her "Dad" that she was on it- yet he was the one who noticed her movement appeared easier!

Another one was "Zeke", an 11 year old Weimaraner. After 2 weeks I get a call from his owners and they said "Zeke is jumping on the bed and going up and down stairs again. He hasn't been able to jump on the bed for a long time." I asked, "Is it good that he is jumping on the bed?" :) They replied, "Yes!"

One other was a little Pom that had "clicking" in her knees - and after a period of taking the product - her owners reported that her knees sounded healthy again.

I am so excited about the Omega 3 for Dogs! I can hardly wait for the other products to come out!

People love their pets, they are part of their family and they want the best for them. (sometimes taking better care of their animals than themselves.)

Thanks so much ENIVA! - You are GREAT! - Carol S., Lincoln, NE

Dear Andrew and Team,

Our dog Abby, was a rescue dog over 6 years ago. We estimate that she is approximately 9 years old. She is a medium dog - Beagle and Blue Heeler are apparent in her markings and behavior. She has always favored her right back leg when jumping and going up and down stairs. We know she was abused by her former owner and think that she was injured by some event there. She started slowing down a couple of years ago even though we were supplementing her diet with glucosamine and chondroitin.

We started Abby on Hip and Joint Support in late July. Within 4 weeks of beginning the change in her diet, she was becoming more attentive and sleeping less, waiting for us to take her hiking. My favorite part of this testimonial was in October. Abby and I went out to Buena Vista, CO, to photograph the turning of the Aspen trees. She had been able to get in and out of the back of our Jeep more effectively on her own by that time and on that particular day, she was probably in and out of the Jeep at least 2 dozen times by herself! She was a very tired dog by the time we stopped shooting pictures but she had hiked with me and still had the energy to get in and out so many times. It was amazing to see!

Thank you for this product, it has changed Abby's life and ours as well!!!!

Blessings to you! - Rhonda G., Colorado Springs, CO

I would like to introduce you to my constant companion, Kenya. She is a 13 year old Lab/Cocker mix. Kenya has had joint issues for several years. She gave up sleeping with us awhile back because she could not jump up on the bed. Our daily walks were very slow paced and sometimes she would just sit down and refuse to walk. I was watching my friend age.

My sister Kathie P., an Eniva ERM, encouraged me to put Kenya on Eniva's Hip & Joint Support. Her Golden Lab, Rebecca Ann, participated in the trial evaluation of Eniva's new product. Kathie shared with me all the wonderful testimonies.

On October 21, 2008 I started Kenya on Eniva's Hip and Joint Support. Within the week I noticed a bounce in her step! She now jumps on the bed at will. I get winded on our walks! Even my neighbor has made a comment about I must have Kenya on new vitamins.

Kenya also takes VIBE and Eniva's Omega's. I am on a mission to keep Kenya's immune system strong so she can live a full, stress free life.

Thank you Eniva for improving my best friend's last years with me. We are both enjoying the benefits of Professional Formula Hip & Joint Support dogs!!!!

We're back playing again! - Sharon S., Gainesville, GA

My name is Mya from Stockton, CA.

I am mommy to Star, a female Retriever mix and Chinook, a female Chow mix both 6 years young and both rescued from euthanasia! Last Christmas Eve, Star was struck by a truck, and she suffered a broken femur. I raced over to emergency to get the diagnosis and doctored her at home.

I happen to have a Naturopathic Veterinarian who values nutrition in healing. I shared with him what my plans were for her speedy recovery. I gave Star VIBE, Cell-ver, Probiotics+ and Efactor. Star's vet mentioned surgery as an option to prevent her from possibly becoming lame and developing a serious hip ailment. At the time I had seen incredible results with my customers and was eager to see results with Star by just using the supplements. After 8 weeks Star was back out running like a puppy again. I now feed my girls organic food, VIBE, and Hip & Joint formula regularly.

Just recently I was away on business for one week. My husband Steve cared for the girls, but he forgot to give them their supplements (since I usually care for them). Upon my return I noticed Star limping from her injured hip. After just 3 days of receiving her supplements, Star is back to running like a healthy dog again! Eniva's products are amazing! The peace I receive from the health and well being from my animals gives me great joy! I love sharing these products for all our precious animals!

Thanks Eniva for creating safe and effective supplements for our pets!

I was first introduced to VIBE through my Vet who recommended that I give it to my dog, Baby Dumpling. She is not a very good eater and we were concerned about her nutrition. She has been on VIBE for over a year now, as have my husband and I.

When Eniva came out with Hip & Joint Support for dogs and cats, we were thrilled. We once had a German Shepherd who had very bad hips and eventually had to be put down.

Although Baby is just five now and not showing any symptoms of painful or stiff joints, we have her on the Hip & Joint Support everyday. We want her to live a healthy and full life - just like us!

Our appreciation to Dr. Ben, Andy and Bill Baechler and the whole Eniva Team for developing these great products.

God Bless you all! - Lori W., Ellendale, ND

Professional Dog Trainer: Wayne C. - WI

Dog: Badger, 8 years old

Breed: Labrador

Badger is a Sporting Dog (hunting, field trials, hunting tests, agility competition, fly ball), and he had been experiencing stiffness after getting up from rest, was reluctant to jump into vehicles and tired easily while exercising. Out of all the field dogs I train, Badger exhibited the most results while on Hip & Joint. I expect great things out of him this Fall. He is a definitive testimony to the great results he has received from Eniva Hip & Joint Support!

Sparky is an 18.5 year old black lab who came to us thru Adopt - A - Pet.

Sparky had a hard life of abuse and advanced age has left him with several challenges, including hip and joint problems. Our vet asked us to try a new product he was looking at and we agreed. The first 2 weeks we only gave him 1 tsp twice a day so when the Vet called to follow up after 2 weeks he was surprised we had only been giving him 2 tsp since his weight is about 86 lbs.

Even with only a half serving we were seeing improvements in his ability to get up the back steps and when doing his daily job he seemed to have less discomfort. Prior to starting the Hip & Joint Support we were concerned about his quality of life and how much longer he would be able to have him with us because we would not be able to carry him in and out of the house. Since Sparky has been on the full serving of 1 oz Hip & Joint Support, we are continuing to see more improvements when he is getting up and he now goes for short walks with us and Junior, our other dog.

We joined Eniva so Sparky could continue taking the Hip and Joint Support as long as he is alive.

Becky H., Fargo, ND

Abby is a 10 year old female Lab with normal hip issues due to her age. She limped after exercise, and was reluctant to climb stairs or jump into a vehicle. She also slept a lot and preferred lying down rather than walking or running as she used to do.

After using the Hip & Joint Support for Dogs she is more active, and this product really seemed to help, and we will continue its use. Abby is now more able to chase a ball or stick, which is her favorite activity.

Mr. Robert P., London, KY.

Dear Eniva Friends,

My name is Rudy and I want to tell you my story! In 2001 I came to my current home. Darrel and Becky adopted me from the local shelter! I have always been a happy dog with lots of energy. I get walked twice a day from my owners and they love me very much! Every summer Becky takes me swimming in the river or lake! I love to retrieve a ball that has been thrown in water or on the land. I would love to retrieve a ball all day long if I could!

The last couple of years I have had trouble with occasional pain in my legs! The doggy doctor thinks I am about 8 1/2 years old! Whenever Becky threw the ball for me, I would limp when I came back after retrieving it! I loved to run home after Darrel had taken me for a long ride in the back of the pickup! But he had stopped doing that because I often limped a lot after running!

In July Becky started to give me this wonderful stuff that tastes very good! In 3 days, I started to notice a BIG difference in the way I would retrieve a ball! Becky started throwing the ball for me more often and I would bring it back with no limping! Whatever it is that she gave me has sure helped! Thank you for making the new Hip and Joint formula for dogs!

In October Darrel and Becky took me for a long ride to look at all the pretty fall leaves turning color! Becky let me out of the truck and I started to chase a ball! I kept bringing it back and we did this for over 20 minutes! I didn't really want to stop! Thank you Eniva for giving me back the ability to run again like I used to. I do not hurt when I run after a ball that has been thrown for me! I would love to shake your hand and say a BIG thank you for giving my youth back to me!

Signed, - Rudy (Becky's dog), and Becky W., Fergus Falls, MN

Amateur Dog Trainer: Bill B. - MN

Dog: Jazzy, 3 years old

Breed: Labrador

Jazzy is a younger dog that trains for retriever field trials. We use Eniva Hip & Joint Support as a nutritional supplement to ensure his agility and mobility for the future. It helps replenish the necessary nutrients for joint health. Jazzy loves the taste, too!

My "before" observation of my dog showed she limped sometimes after extreme exercise and she had problems going up stairs. What I observed once she started to take the Eniva Hip and Joint Support product for Dogs was remarkable.

After taking the supplement she would go up and down the stairs with me through out the day. She never did that before. I realized she was struggling to get up and down before taking the supplement, and after she did not. She has always acted like a pup and still does at the age of 9 but she can play longer and with more vigor since the supplement.

I am impressed with the formula and plan to continue it to my dog. I want her to live as healthy and as long as possible. I believe this could help her joints last longer. Thank you.

Sincerely, - Christina L., Fort Collins, CO

Lets Kennel up and find out what I had to Bark about

By Rebecca Ann Peterson (12 year old Lab ) Sept. 1st 2008

Dear Dr. Ben, Andy and Eniva Team;

Most of you already know me as Rebecca Ann Peterson from Winona ,MN.

I have been hounding you for many years to get a wag on for a Nutritional line for pets. As you know, I was one of the Lucky four-legged family members to be picked to try the ALL NEW Hip and Joint. WOW!

I noticed the difference in just 5 days and so did Mom. As the weeks went by, I got more and more stamina, rested less and drove Mom nuts with wanting to play more and take longer hikes up the ridge.

My favorite place to be is in the back of Mom's Explorer but she would help me in or park so I didn't have to jump up. Well let me tell you, I don't wait for help anymore - I can jump in all by myself! What a proud Lab I am because I don't care to ask for help with anything, I prefer to do everything myself. and I am a SMART spoiled brat—Ask anyone.

Let's talk about my Frisbee. I love this sport but I was not catching it in the air as I did a couple of years ago. To catch a flyer was not something I really could do anymore.

I CAN NOW--- so my Step Brother Buster, has to keep an eye on which Frisbee he is catching and it better not be mine.

I am sure that my wonderful Vet Dr. Denisen has helped too, but most all this activity started after I was taking the Hip and Joint Support product from Eniva!!!

Four Paws up to Eniva! You are Barking up the Right Tree.

Rebecca Ann Peterson, Mom-- Kathie, Dad--- Dave

P.S.: Maybe Dad will take me Pheasant hunting again this year -That would be the BEST! I must say, I was really good at it too.

Dog: Kate, 9 years old Breed: Labrador

After eight years of year-round training and having four litters of puppies, Kate now has a spring in her step! This product should give her another year of competing in a more comfortable mode.

My Name is Kimberly Lee. I have been on VIBE 3 1/2 years and it changed my life. Back in May of 2008 we got a new puppy, a Saint Bernard - some would not call him a puppy. Jack is 34 inches tall so far. The average height for a Saint Bernard is 26 to 28 inches tall. He weighs 127 lbs. as of now. He can get up to 200 lbs. at full grown. As of today he is 11 months old. When he was about 8 months old he started limping. We took him to the vet and had a load of tests done. It was determined that he had grown so fast that the cartilage in his shoulder was damaged and if it did not get better they would have to do surgery. I ordered the Eniva Professional Formula Hip & Joint Support For Dogs. Within 2 days of giving it to him he was moving around very well. The cool thing is my Vet takes VIBE and loves it.

Jack did fine for a few weeks then started having no energy and not eating as much. Of course I took him back to the vet. They ran a test for a particular illness that is found here in Arizona. Animals and Humans who don't originate from here can get it easily. It comes from the desert floor. (Jack was bred in Kentucky). We've come to find out he had a low grade case. Now this illness attacks the lungs - lasts from 3 to 6 months and is VERY expensive to treat. Makes you feel like you have the Flu the whole time. I decided to give him VIBE Original - one ounce a day. Within a week - well, he's his normal self. No coughing & tons of energy, etc... I am not at all saying that VIBE cured her, but So once again - Eniva products helped support wellness! Thank you, Eniva, for my health and my Family and the doggie. I am attaching a picture of Jack. His full name is "Lee's Jack Daniels Sparrow" - He is the new love of my life!

God bless, - Kimberly L., Phoenix, AZ

## Eniva Hip & Joint Support for Animals (32 oz.)

Eniva® Hip & Joint Support for Animals™ provides veterinarian recommended, ultra pure and high-potency nutrients to support healthy hip & joint mobility for active animals. This all-liquid design is formulated for enhanced absorption and performance.

- Joint Mobility
- Cartilage Health
- Joint Comfort
- Bone & Tendon Strength

### High-Potency:

- Glucosamine
- Chondroitin
- MSM
- Antioxidants
- Type II Collagen

## Omega-3 Complete

Eniva® Animal Omega-3 Complete™ is a specialized liquid nutritional supplement providing your pet with a potent formulation of the most scientifically researched Omega-3 essential fatty acids. This broad spectrum Omega-3 profile has been safety tested and provides increased benefits for enhanced performance.

- Promotes healthy coat, skin and joints
- Supports healthy heart and blood vessel
- Enhances mental focus and scenting
- Promotes healthy temperament
- Combats inflammation
